

Present for Retrospective: Dane Reggia
 Chris Touchette
 Gabriel Mayo
 Billy Loveday

What we did well:

- 3D models turned out good
- Integration of code was successful
- Sprint review went well
- Communication during the week improved

What did not go well:

- Chris was ill and not able to contribute as much as he might otherwise
- The team feels like they could have accomplished more despite their successes during the week

Delta:

- Show failures in the review
- Individual work is giving way to more collaborative effort and code integration
